

Anh Phan

Research Assistant

quynhanhpt551@gmail.com [Website](#) [LinkedIn](#)

EDUCATION

	<i>Degree</i>	<i>Institution</i>	<i>GPA</i>
2019-2023	Bachelor of Information Technology	RMIT	3.8/4.0

EMPLOYMENT HISTORY

	<i>Position</i>	<i>Employer</i>
2023-now	Research Assistant for Math Modelling group	Oxford University Clinical Research Unit (OUCRU)

PROJECTS

serosv: develop an easy-to-use and efficient tool to estimate infectious diseases parameters (seroprevalence and force of infection) using serological data

Role: developer | [GitHub](#) | [Website](#)

denim: develop an R package for building and simulating deterministic discrete-time compartmental models with memory.

Role: developer, maintainer | [GitHub](#) | [Website](#)

serodt: develop an R package for managing OUCRU serological data.

Role: developer

measles modeling: analyze measles outbreaks in Ho Chi Minh city

Role: modeler

TEACHING

R for babies - Practical R programming classes.

Course webpage: <https://drthinhong.com/r4babies/>

R cafe - Reproducibility in research, using R.

Course webpage: <https://oucru-modelling.github.io/R-cafe-materials/>
